

EXACT EXTERNAL FOOTPRINT DIMENSIONS (mm)

use 'mm' measurements.

MODEL	A (mm)	B (mm) DIAGONAL
OCT 66	1910	2066

We cannot emphasize how important it is to have a proper base for your Greenhouse to be erected upon.

It is essential that the **BASE IS FLAT, LEVEL AND SUBSTANTIAL** enough to take the weight of the greenhouse including its glass.

Give yourself enough room around your base to allow for fitting the glass and any on-going maintenance / cleaning. A slab base which is larger than the greenhouse is the ideal solution and is our preferred foundation. Slabs are ideal because they allow for some drainage between them (no greenhouse is 100% waterproof) and they will also help support the lower door runner SY659 and threshold SY661 (see section '9').

IMPORTANT: Do not anchor your greenhouse down until it is fully assembled including glazing unless you are 100% sure your base is square and level. If not your glass will not fit properly.
